### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Applicant's amendment of claims 37 and 38 overcame the previous interpretation of "consists essentially of" (see paragraph 14 from the 12/12/2007 office action). Applicant's amendment to claim 39 requiring the capillary tube to be uncoated overcomes the teaching of Guttman. The previous examiner took the position that col. 11, ll. 40-47 provides support for the use of the gel separation medium in uncoated tubes. However, this examiner interprets this passage as stating that any known buffer solution useable with uncoated tubes is also useable with the coated tubes of Guttman. Hence, there is no suggestion in Guttman of utilizing its particular buffer solution in an uncoated tube, but only that prior art buffer solutions (presumably not having the compositions of Guttman that previously read on the claimed compositions) could be utilized in Guttman's coated tubes. Moreover, col. 11, ll. 52-56 would appear to read away from any suggestion of using the buffer solutions of Guttman with uncoated tubes. In particular, this passage states that the use of coated tubes allows for the use of buffers having higher ionic strengths. Because the buffer solutions of Guttman would presumably be taking advantage of the ability to utilize higher ionic strengths, one clearly wouldn't be motivated to utilize these same high ionic strength buffers in uncoated tubes because high ionic strength was not desired for uncoated tubes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
